NOTE TO MAP USERS

These maps are designed and published as a planning and management tool. They are prepared from the best available information. Some of the lands acquired by Federal agencies may be still shown as patented (White) lands due to the lack of information available to BLM with respect to the nature of acquisition. Access through private lands may be restricted. Due to map scale some features such as roads are approximations and it is not possible to show ownership status of all small tracts below 10 acres. Ownership status and road conditions are dynamic features and change with the passage of time. The official land records in appropriate offices of the BLM and other Federal agencies should be checked for up-to-date status on any specific tract of land. Inadequacies in the BLM maps should be reported to the respective Bureau of Land Management office from which the maps were obtained.
